

The Gap

Open Call

The world we knew stopped a year ago. From one day to the other, our lives changed drastically. The Number 1 topic since then: Corona. In the turmoil of the pandemic, other crucial topics that affect society had to take a back seat.

We want to focus on issues that have been neglected over the past year. The_Gap intends to highlight what else is important, apart from the pandemic. The_Gap, an empty space and a place that is kept free for the issues not mentioned - a space for diversity.

Which issues did society forget about due to the pandemic? What gaps have emerged? We want to emphasise an intercultural dialogue on the topics that have become invisible in this period. Which story burns under your nails that people in other places need to know about? Which topics do people from different backgrounds than your own need to be discussed? We want to understand the issues that young people from the Euro-Mediterranean region conceive as problems of our time. What is the_Gap that we need to shed light on?

We collect contributions from **the fields of art, culture, politics and society**. Send us your photos, drawings, texts, poems, videos and other creative works... This is the stage for your contribution.

The ALF and its national networks promote intercultural dialogue and focus on civil society exchange.

This event is part of the ALF Virtual Marathon for Dialogue which gives civil society - and especially young people from the Euro-Med region - the opportunity to discuss current issues. The online exhibition "The_Gap" thus creates a place and a platform for intercultural exchange and dialogue.
